

## Quick Guide

WebSquare 5

**gridView.column**

**customFormatter**

## Goal / 목표

Set the data display format in certain columns using a function.

/

GridView 특정 컬럼의 데이터 표시 형식을 함수를 통해 설정.

## Property / 관련 속성

**customFormatter="yourFunction"**

```
yourFunction = function(data, formattedData, rowIndex, colIndex){  
    if (data == "Movie") {  
        gridView1.setCellColor(rowIndex, "Hobby", "red");  
        gridView1.setCellBackgroundColor(rowIndex, "Region", "orange");  
    }  
    return formattedData;  
}
```
