

## Quick Guide

WebSquare 5

\$p

dynamicCreate()

## Goal / 목표

Dynamically create  
WebSquare5 components.

/

동적으로 웹스퀘어 컴포넌트를 생성.

## (Example / 사용 예)

```
$p.dynamicCreate("group1", "group", {  
  style: "width: 200px; height: 40px; margin: 50px"  
});  
  
$p.dynamicCreate("textbox1", "textbox", {  
  style: "border: solid black 2px; float: left; width: 200px;  
height: 20px; float: left; margin-bottom: 20px"  
}, group1);  
  
$p.dynamicCreate("calendar1", "calendar", {  
  style: "width: 200px; float: left; height: 40px; float: left"  
}, group1);
```
