

Quick Guide

WebSquare  5
GridView

subtotalStyleFormatter
subtotalColumnId

Goal / 목표

Decides the CSS class to apply to each of the subtotal columns.

/

subtotal 컬럼 별로 적용할 CSS 클래스를 판단. 즉, subtotal 컬럼에 따라 서로 다른 CSS를 적용.

Example / 예제

```
scwin.styleFormatter = function(value, formattedValue, subtotalColumnId) {  
  if (subtotalColumnId == "column16" || subtotalColumnId == "column18") {  
    return "w2subtotalformatted";  
  } else {  
    return "w2subtotalnotformatted";  
  }  
};
```
