

Quick Guide

WebSquare 5

WebSquare.util

multipleDataListDownload()

Goal / 목표

```
var options = {
  common: {
    fileName : "dataLists_down.xlsx",
    multipleSheet: "true",
    showProcess : false
  },
  excelInfo: [
    {
      dataListId : "dataList1",
      sheetName : "No. 1",
      removeColumns : "",
      wframeId: "wframe1" → in WFrame
    }
  ]
};
WebSquare.util.multipleDataListDownload( options );
```
