

Quick Guide

WebSquare 5

\$p & WebSquare.util
getEventTarget()

Goal / 목표

Check component information
where an event is triggered. /
이벤트가 발생한 컴포넌트의
정보를 반환.

(Example / 사용 예)

```
scwin.trigger1_onclick = function(e) {  
    var info = $p.getEventTarget(this);  
    // var info = WebSquare.util.getEventTarget(this);  
    var pluginName = info.pluginName;  
    var id = info.id;  
    var realId = info.realId;  
    alert(pluginName + id + realId);  
};
```
