

Quick Guide

WebSquare 5

\$p

data.create()

Example / 사용 예

```
var option = {  
  "id" : "dataList1", "type" : "dataList",  
  "option" : { "baseNode": "List", "repeatNode": "map"},  
  "columnInfo" : [{  
    "id" : "Code",  
    "name": "Code",  
    "dataType" : "text"  
  }, {  
    "id" : "CodeName",  
    "name" : "CodeName",  
    "dataType" : "text"  
  }]  
};  
$p.data.create( option );
```

JSON

Example / 사용 예

```
var dcStr = '<w2:dataList id="dataList2" baseNode="List" repeatNode="map" valueNode=""> '+  
  '<w2:columnInfo>'+  
    '<w2:column id="Order" name="Order" dataType="text"></w2:column>'+  
    '<w2:column id="Date" name="Date" dataType="text"></w2:column>'+  
    '<w2:column id="Code" name="Code" dataType="text"></w2:column>'+  
    '<w2:column id="ID" name="ID" dataType="text"></w2:column>'+  
  '</w2:columnInfo>'+  
'</w2:dataList>';  
$p.data.create(dcStr);
```
