Quick Guide

WebSquare 5

WebSquare.date

toLunar()
toSolar()

Goal / 목표

Convert a lunar calendar date into a solar calendar date or vice versa. /

음력 날짜 ↔ 양력 날짜 변환.

Example / 사용 예

```
// Convert to a solar calendar date.

var date1 = input1.getValue();
var result1 = WebSquare.date.toSolar(date1);
input2.setValue(result1);

// Convert to a lunar calendar date.

var date2 = input2.getValue();
var result2 = WebSquare.date.toLunar(date2);
input1.setValue(result2);
```
